

Case Studies

The successful application of the Dolocrete® technology to a diverse range of hazardous wastes on a commercial scale is indication that the technology is competitive within the waste treatment market. DoloMatrix has been compiling case studies over a number of years. These include the:

- Treatment of Coal Tar with Dolocrete®
- Treatment of Organics with Dolocrete®
- Treatment of Mercury Compounds with Dolocrete®
- Treatment of Arsenic Compounds with Dolocrete®
- Treatment of Cyanide with Dolocrete®
